## ST 011

- with 1 incremental encoder input
- 1 output channel for the motor control
- 2 digital optic coupler outputs
- 2 digital inputs

The S-DIAS ST 011 stepper module can be used to control stepper motors and servo motor power components. The digital inputs are provided for the reference motion and monitoring the end positions. The ST 011 also has two digital optic coupler outputs. An incremental encoder connection with A/B/R analysis is available as well as the corresponding +5 V incremental encoder supply.
